I agree that you should contact someone at Fisk and from an advisory capacity inform them of the potential problem. Let them know that we have NOT received a complaint and are calling to just advise them of what I am assuming is a lack of knowledge on their part of knowing that they are violating the regulations. Be as diplomatic as I know you can. Thanks

Nick, Bob Schaefer indicated that we should probably inform Fisk of the problem and potential consequences but, I should run it by you before doing so. Let me know your thoughts for direction.

Teresa, I swung by East Trafficway after talking with you a couple of days ago and Fisk was washing a van outside the old Sears garages and water was flowing almost to the street. It did not appear that they were using very much detergent, if any. I think I should contact a person at Fisk in charge of maintenance and inform them that no matter where they perform this activity, if complaints are received, they will be in non-compliance with storm water regulations and would be required to either obtain an NPDES permit from DNR or wash vehicles at a carwash tributary to City sanitary sewer. Let me know what you think.

Randy:

I went by there yesterday afternoon and it appears that the water is running out of the old Sears Automotive center and into the street. My thought is that - since it will be torn down soon - forget about it. But thanks for getting back with me!!

Randy:

600 BLOCK EAST TRAFFICWAY

Steve Meyer recommended that I notify you about this.....Fisk Limosine manufacturer offer washes their cars and the runoff ends up ponding in the middle of the street behind the old Sears Building. Steve thought that you may need to know in case they are in violation of something.

Nick, yes, the vehicle washing has been observed outside on the north side of the old Sears automotive repair center, not on the north side of East Trafficway. I guess I assumed that property was in the park project as well. One of our inspectors observed them washing a van there again a few days ago, after I talked with Mr. Baehr of Fisk.

Thank You. If I'm not mistaken, they are performing this activity on the south side of Trafficway on the Trade Center Property. This structure is not part of the Jordan Valley Park project. It is owned by Mr. Hammons and will stay for however long he wishes. The old Sears Building that the City has purchased is on the north side of Trafficway, just east of the DaBryan Coachworks building. Someone tell me if they are north of Trafficway and I just don't know it!!!

I talked with Bill Baehr of Fisk Limousines and informed him that we had noticed some water being discharged outside from car washing activities. I told him we just wanted them to be aware that if complaints were to be received, MDNR would probably inform them of the stormwater regulations and direct them to cease the activity and perform fleet washing at a facility tributary to the POTW. They were advised to keep this in mind as they relocate the activity after the old Sears building is gone.
